

Summary

UX Designer and researcher with background spanning eCommerce, EdTech, and HealthTech. Six years of understanding user needs translate directly into design decisions grounded in evidence. Comfortable owning a project from user insight through to hi-fi UI, using Figma, Lovable, and Claude Design/Code to move fast from concept to prototype.

Experience

UX Researcher

refurbed
Berlin, eCommerce

May 2024 – present

- Sole researcher across 11 product squads, partnering closely with designers to translate findings into product and interface decisions
- Facilitated workshops with PMs and designers to turn research insights into concrete design directions and roadmap priorities
- Created "Meet the customer," a company-wide program giving cross-functional teams direct access to customer sessions, building shared understanding between research and design

User Researcher

Zalando
Berlin, eCommerce

Jul 2022 – Oct 2023

- Built a foundational B2B customer (partner) understanding through field visits, interviews, and workshops, creating partner personas that directly shaped the product roadmap for partner-facing tools
- Partnered with designers and PMs on research planning, ensuring findings translated into concrete design and product decisions
- Improved research process and cross-team collaboration

UX Researcher

Preply
Kyiv / Barcelona, EdTech

Dec 2019 – Jun 2022

- Conducted UX research with students, tutors and B2B clients to improve video lesson experience, learning materials, and engagement
- Combined qualitative and quantitative methods, partnering with data analysts to triangulate findings and inform product and design decisions
- Won an internal hackathon: proposed an idea based on customer pain, gathered a team, launched an MVP solution as an A/B-test in 2 days

Junior UI/UX Designer

KPMG
Kyiv, HealthTech / Outsource

Aug 2019 – Nov 2019

- Designed a HealthTech app prototype from scratch, from early concept through hi-fi UI screens
- Translated client requirements into interface designs, iterating directly with the client on scope and priorities
- Worked closely with developers to ensure designs were technically feasible and implementation-ready

Sales Development / B2B Support Representative

Grammarly
Kyiv, EdTech

Aug 2016 – Feb 2019

- Communication with existing and potential customers
- Created customer personas and helped define the value proposition for a new product, Grammarly Business
- Worked with a PM and developers on feature requests for the enterprise customers

Key skills and strengths

- Design tools: Figma, Adobe Illustrator, Lovable, Claude Design, Claude Code
